

Automated Trailing Solutions

Demo vehicle

Benefits for OEM, drivers & passengers

- **Hitching:** Semi-autonomous system to backup and hitch a vehicle to a trailer with precise maneuver.
- **Reverse Assist :** Easily reverse a vehicle-trailer system, with intuitive control to enhance user experience and safety.
- **Turn Collision Warning:** To prevent collision with Pedestrians, Curbs, Vehicles, etc.
- **Merge Assist:** Blind spot detection to support driver with trailer to make safe lane changes.
- **See Through Trailer:** Visibility of the rear traffic behind the trailer during forward and reverse maneuvers.
- **Backtrack:** Automated reversing of the vehicle with trailer through previously driven path up to 50 meters
- **Automated user defined parking** with trailer

Our value proposition

Our Automated Trailing Solutions ensure redefined user experience from hitching, driving and parking-into a seamless, stress-free process. Whether it's precise coupling, safe overtaking, parking or even getting you out of stuck situations.

AUMOVIO Technology

- **Automatic Trailer detection** with out any manual inputs, supports **Conventional and Goose/5th Wheel** trailers reverse assist with single camera.
- Hitch and tow-ball **collision avoidance**, input to adjust vehicle's height to enable hitching a trailer with minimal human involvement.
- **Backtrack feature** help with difficult reverse scenarios and back up maneuvers with trailer.
- With our white-box approach, OEMs can choose from **software-only** offerings to **complete system solutions** including sensors, accelerating time-to-market and lowering development costs.
