

Xelve Park Drive Pilot and Compute Exhibit

Benefits for OEM, drivers & passengers

- AUMOVIO delivers **Xelve**, a scalable solution for both volume and premium markets. It seamlessly integrates hardware and automotive software to create an entry point for Software-Defined Vehicles, supporting SAE levels L2 to L4.
- **Xelve Park** is optimized for advanced parking assistance, providing easy to use and safe parking experiences.
- **Xelve Drive** provides SAE L2(+) system solutions together with our trusted partners—from architecture definition and integration services to data services and vehicle level calibration, triage, validation and homologation services. We support OEM customers with their needs from SW products and services to Turn-key system solutions
- **Xelve Pilot** enables the future of transportation with Autonomous vehicles (starting with Trucks). One feature is an SAE L4 fallback system, which ensures vehicle safety in the event of system failure
- **Xelve Compute** demonstrates how AUMOVIO powers the Future of Intelligent Mobility

Our value proposition

Xelve Park – Redefined user experience
Xelve Drive – Humanized Driving
Xelve Pilot – Ensured safe L4 operation

AUMOVIO Technology

Xelve Park showcases the years of innovation from the Transparent vehicle features to Radar Vision Parking , while incorporating the redefined user experience enabled by the Human Vision knowledge

Xelve Drive delivers a hybrid architecture to bring the benefits of end-to-end with classical drive policy, while still being cost efficient

Xelve Pilot conveys a new business model (Hardware as a service) and a pioneering technology collaboration
