

Connected Experience Demonstration

Demo vehicle

Benefits for OEM, drivers & passengers

- Varifocal HUD offers a cost-effective augmented reality HUD solution with its tilted image plane design.
- In2visible OLED display solutions offer a seamless cockpit integration.
- 3 row Child Presence Detection (CPD) using UWB (Ultra-Wideband) Technology.
- Full vehicle Intrusion Detection using UWB Technology.
- In car Gaming technology offers an expansion of functionality of radars, cameras and other integrated technologies of the vehicle.
- Ac2ated Sound offers a flawless replacement of speakers in the vehicle, to ensure a lighter vehicle, (focused on external sound in-car gaming for this demonstration).
