Cloud Transformation: AUMOVIO and SAP Form Strategic Partnership for a More Agile IT Setup

- **AUMOVIO is migrating its entire SAP landscape (software, infrastructure and services) to the cloud, ensuring faster processes and more agile scaling**
- **Implementation of SAP Cloud ERP Private provides a secure yet flexible digital foundation for future-oriented business processes and sustainable value creation**
- **Future innovations, such as AI agents and centralized updates, can now be rolled out much faster across the organization**
- **AUMOVIO Chief Information Officer Thorsten Pache: “Our move into corporate independence was the perfect starting point to rethink our future IT setup. With SAP Cloud ERP Private, we’re taking the next steps toward cloud transformation, more efficient IT structures and digital innovation”**

Frankfurt am Main, Germany, November 27, 2025. AUMOVIO is underlining its ambition for a more agile and flexible corporate structure by transforming numerous IT infrastructure solutions into a cloud architecture. This shift will not only streamline the technology and electronics company’s costs for core IT applications but also deliver the benefits of optimal scalability to support its future growth.

At the heart of this transformation is the migration of AUMOVIO’s SAP landscape, comprising software, infrastructure and services, to SAP’s cloud-based ERP (enterprise resource planning) system. AUMOVIO and SAP have entered into a long-term strategic partnership to accelerate innovation, enabling faster and organization-wide deployment of updates and AI-driven solutions.

“Our move into corporate independence was the perfect starting point to rethink our future IT setup. With SAP Cloud ERP Private, we’re taking the next steps toward cloud transformation, more efficient IT structures and digital innovation,” says AUMOVIO Chief Information Officer Thorsten Pache.

Tailored ERP solution as a future-proof, scalable foundation

The new cloud-hosted platform integrates core business applications, harmonizes data in real time across international locations and enables informed decision-making based on connected, contextualized information.

Enhanced supply chain transparency and continuous process optimization will future-proof operations, eliminate silos and reduce operational risks – all with the goal of sustainably improving efficiency and customer satisfaction. Migration of the first systems will begin later this year using a “lift-and-shift” approach, ensuring existing applications are transferred quickly and efficiently to the new cloud infrastructure without major changes, while driving digital transformation and innovation forward.

“The rapid implementation of key steps in our company-wide system transition impressively demonstrates how much speed AUMOVIO has gained – and how closely IT and Procurement work together. With this foundation, we will successfully manage the migration phases of the system as well,” says Peter Popp, Chief Procurement Officer at AUMOVIO.

Press Release

With an advanced cloud setup, AUMOVIO is well-positioned to scale innovation, optimize processes and respond flexibly to market demands, leading the way as an adaptive powerhouse for safe, exciting, connected and autonomous mobility.

In September 2025, AUMOVIO officially launched as an independent company, continuing the business of Continental's former Automotive group sector (including the Contract Manufacturing group sector). The technology and electronics company offers a broad portfolio for safe, exciting, connected and autonomous mobility, including sensor solutions, displays, brake and comfort systems as well as extensive expertise in software, architecture platforms and advanced driver assistance systems for software-defined vehicles. The business areas now operating under AUMOVIO generated sales of €19.6 billion in fiscal 2024. Headquartered in Frankfurt am Main, AUMOVIO has over 86,000 employees at more than 100 locations worldwide.
