AUMOVIO successfully completes sale of Rheinböllen site

- **RHB-Industries is the new owner of the AUMOVIO site in Rheinböllen, Germany**
- **Transaction includes production, research and development, as well as all employees and business activities at the Rheinböllen site**
- **Completion underlines AUMOVIO's progress in consolidating its global manufacturing footprint and its strategic focus on core business**

Frankfurt, Germany, July 2, 2026. Technology company AUMOVIO and transformation consulting firm Falkensteg have successfully completed the acquisition of AUMOVIO's Rheinböllen site. As part of the [agreement on the sale announced on April 29, 2026](#), RHB-Industries, established specifically by Falkensteg, has taken over all business operations as well as the employees at the site.

Around 320 employees work in Rheinböllen. In close exchange with the social partners, a collective bargaining agreement on the transfer of employment conditions was concluded at an early stage. With the transfer of employees to RHB-Industries, the workforce is supporting the future-oriented realignment of the site. Brake calipers and electric parking brakes are produced at the site.

"The successful completion of the transaction is another important step in implementing our strategy. We are strengthening our core business and focusing our research and development activities as well as investments specifically on future technologies. At the same time, the completion underlines our progress in consolidating our global manufacturing footprint. The new ownership structure ensures continuity for employees, customers and partners," says Philipp von Hirschheydt, CEO of AUMOVIO.

RHB-Industries plans to introduce contract manufacturing in the area of brakes at the Rheinböllen site to support ongoing series production projects. RHB-Industries has also committed to developing future-proof business ideas that will enable production and employment at the site in the long term. As part of this, the plan is to open the site up to additional markets – particularly for applications in the areas of defense, brake-related applications, contract manufacturing in robotics, and industrial applications such as large heat pumps.

Alexander Dietel, Managing Director of RHB-Industries and Partner at Falkensteg: "We look forward to further developing the Rheinböllen site together with the employees and positioning it for long-term success. Over the past few weeks, we have already been in close exchange with those responsible on site and have made initial preparations for all upcoming steps."

In September 2025, AUMOVIO emerged as a spin-off from Continental's former Automotive group sector and has since established itself as an independent technology company. The company offers a broad portfolio for safe, exciting, connected and autonomous mobility, including sensor solutions, displays, brake and comfort systems as well as extensive expertise in software, architecture platforms and advanced driver assistance systems for software-defined vehicles. In fiscal year 2025, AUMOVIO generated sales of € 18.5 billion. Headquartered in Frankfurt am Main, AUMOVIO has around 82,000 employees at more than 80 locations worldwide.
